Well when I play Renegade it crashes randomly. Somtimes I think it crashes for a reson but the resons are:
1)A bulding blowing up
2)Becon going off
The rest of the time it is so random, I have tryed EVERYTHING to stop it! Dose anyone have any suggestions? I would REALLY like to play a enture 30 minits without having to restart the game.

System Speks:
Windows 2000(Wich I herd is bad for gaming?)

Nvidia gfx card (forget what type but it did it before I got this card)

I use headphones and have no clue what the card is?

So if you know how to make is stop let me know!

so if it crashes every 31 mins you dont mind?

What have you got installed except Ren and 1.037 patch? Do you have RG, CP1, what version of scripts.dll etc etc...

Latest scripts.dll (Talked to john and he looked at some txt file he sad scripts arent causing it)
CP1, Renguad sux so no RG for me!

Reinstalled 10 times with no effect.
I cant reformat it is my dads computer not mine.
(I need a job so I can get my own computer...)

Then I am not sure what your problem could be, is it on one server or all servers?

I know mine tends to crash on servers with airstrip drop-mods when a building is destroyed or a beacon goes off
