did you install renegade patch 1.037 before installing RG?

I would suggest downloading the stand alone files...not sure what the link is but someone will
hopefully post it

no, i meant the CP1 stand alone files (*cough* the files they put online when RG install had a habit of messing some files up *cough*)

The Don: You MUST install the renegade 1.037 patch BEFORE renguard. You have to;

1) uninstall renegade

2) delete renegade folder

3) install renegade

4) install renegade patch 1.037 (use the auto-patcher, cancel it at 100% downloaded and it will install)

5) install RG

6) allow it to download and install cp1 if required.

ftp://ftp.westwood.com/pub/renegade/updates

pick your language patch from there, download and install
