Anyone remember Flyingbuzz? Cause I sure do lol. Anyone who's been around for a long time remembers this cd-key stealer. Anyhow someone sent me one of those Ebaums IM pranks, and I was like hmm... Flyingbuzz is on my AIM Buddy list from so long ago when I was hassling him about his key-stealing flying mod. Anyhow I sent him one and set the conversation starter to be I know about the serial keys The Renegade Serial keys I know what youve done Ill tell everone. This is what happened:

sillythang502(03:07:30): I know about the serial keys The Renegade Serial keys I know what youve done Ill tell everone
