Click on the link on the top of the mod forum - Dante's help file has the answers you need. (my bridge tutorial is in there - and it explains building controllers and other things)Nope - exteriors and interiors *do not* need to be seperate - Westwood did it for lighting purposes. I always make mine seperate -> easier to mod - but beware the clipping monster...! [November 11, 2002, 11:27: Message edited by: StoneRook]
