I have been having this prob sometimes that for no apparant reason Islands.mix goes corrupt and I get booted off the server by renguard for it. Usually some reinstalling Renguard or even renegade works but now it doesn't although I couldn't reinstall renegade because of a crack in the installation disk. Replacement is on the way but that might take 4 to 10 days. Does anybody have a non-corrupt islands for me? I tried blackhandstudios but the download doesn't work.

Thanks you are my saviour now to see if it works

Not the fastest download but I guess I will be just as happy in an hour

Dude I have no clue everything else I download with at least 500 kb a sec but this one wouldnt
budge but I got it anyway

IT lesson 1.0 - How a download works:

1. You click a download Button - to make this short -

2. Download starts.

3. If the server is limited to upload at a max of 5kbp/s for each user, then it doesn't matter at allwhat speed your connection is.

4. If you are uploading, the speed of the upload is usually determined by your connection as the servers is usually faster.

 http://www.multiplayermaps.net/pafiledb.php?action=category& amp;id=75

Here you can download all the original westwood maps and a few
other files that sometimes get 'corrupt' and cause RG
to boot you.
