I guess you could say it's RenGuard 101, but only the l33t people took the class. It's very exclusive.

Actually, I think he's referring to source code, but that's so easy to get that even he should be able to manage it.

Unless of course he's unl33t, in which case, this topic should be locked for lethal doses retardation exposure.

Hint: It wouldn't be hard to parse the results from
http://www.renguard.com/locator.php?advq=srch_str
