I beg to differ.

(12:52:42) lynx53681 @ 72.9.26.185 has a bad file in his renegade directory (game2.exe).

We are blacklisting the known cheats the claim to bypass RenGuard. Guess what.. they don't, the
only thing they do is to get you banned from RenGuard

But anyway $25 is a bit too much, alot too much. Any non-moron knows you can get renegade for $2 from the bargain bin in game shops.

true, but why should cheaters get away lightly? and actually finding a copy of renegade is probably harder than it sounds...

It isnt to hard. Do what i did: Get it in the C&C Battle Chest, or whatever it was called. You get TS, RA2, RA2: YR, and Ren.

Hmm, kinda really confused now cause not once did i ask to be unbanned or asked if there was a way around it. Dont really matter if anyone in a game thinks i am cheating with anything bighead, bones.ini, or anything just test me what ya want me to do shoot around your head, legs,   shoot ya with pistol in chest, head, foot or any other part to prove no damage mods. And still didn't answer my question anyway.How can i have cheats if i completely reinstalled renegade anyway?

Either way im not payin $25 to get unbanned, cause the game is still fun and not payin $25 for a mistake in YOUR system.

Well, you really told him. Maybe next time it will be his dog that gets him banned. lol

No, at one time my little brother found some bigheads and went mad about them. He was all over them, and got me banned from 3 servers, in the end i deleted his cheats and restricted his Internet to only allow him on Google.com, just to teach him a lesson.

I now dont let him use Renegade and keep it all for myself.

Look, moron. If you try to bypass renguard YOU WILL GET BANNED.

Microsoft and BHS are totally different things.

Windows XP is alot larger than renguard which is only a few megabytes. Because XP is so much bigger there is more room for errors and exploits.

So stop bullshitting us and face facts, you tried to bypass rengaurd and you got banned, donate to BHS or shut the hell up.

Retard.

"bad" file means known blacklisted cheat.

We only have 2 "bad" game2.exe files, which are both designed to bypass RenGuard, which we have fixed a while ago.

God no, it was sarcasm. Please dont ban us all, i really do enjoy Renegade and... Theres a weird squeaking noise coming from behind my desk... Anyway, i really do enjoy Renegade, and believe Black Hand Studios is doing an excellent job at preventing cheats, and fixing bugs etc. etc... Theres that damn noise again... Do continue to not ban the entire Renegade community, and do such great jobs at what you all do.

P.S. Theres that damn noise again. Man its scary.

That's why they spend hundreds a month just keeping the servers running, and how many people get banned? Maybe one person a week? Even if all of them donated the $25, it still couldn't even cover the cost of Renguard, let alone make profits.

In a recent post i see the guy element or jalil (not sure if they same person), either way one of them got unbanned for using a blacklisted exe file. If i am correct that is what i am banned for understanding from mac's posts but element or jalil got a second chance and i'm still sittin here.

The post is here http://www.renegadeforums.com/index.php/t/15827/0/

Point that I am trying to make is that you can't give one person a second chance and no one else.
