Gimmeh

Please include screenshots in the zip/rar archive!

--

Any textures and models uploaded will be packed into an installer and placed in the main download database asap.

Also note that NONE of the files on the submit page are scanned for potential viruses and/or trojans, we will of course check the files before placing them in the download database, but until then there is absolutely no guarantee on these files from being virusfree - use at your own risk.

Uploaded my crappy "Tranquil Cosmos" Stealth Effect replacement skin. It's pretty. \*shrugs\*

Attached a good powersuit skin for Sydney (from C&C DEN)

& the E3 2001 Laser (CNC-Source) stuff needs to be authorized because it kicks me out when it detects the models so I can't use it

#### File Attachments

- 1) [powersuitII.zip](#), downloaded 54 times
  - 2) [e3\\_2001\\_lasr.zip](#), downloaded 64 times
-

I use the E3 Chain Laser Rifle online with RG, have done for about a year now....its a skin only I believe, not an actual model...

Well it comes with 2 .w3d files in the .zip. Or am I not supposed to copy those? (the .zip contains 2 .w3d models, 8 .dds skin files & one ingame preview shot. There is no readme so I assumed to copy everything (except preview shot of course) to the Date directory.)

Well try putting only the .dds files in, should work then.

I believe the models were included so you could preview the model in W3D viewer, it's probably the same one as in always.dat
