1. does it have all the bones it needs?2. Do you have enter/exit transitons?3. is there 1 or more seats under the settings?Just check one of those.

All vehicles that are driven in Renegade need bones, transitions and at least one seat, check over the stuff that laser put down above.

The Civilan ones work right? anything under the "Vechiles" preset are the only things i think you can drive. I don't think the Cargo Truck was made with bones, merrily for decor.
