Ok.. i used to use Rg everytime i played cnc but now i cant for the past month or so i keep getting an error ive reinstalled RG and cncr a number of times any got any idea plz post or email me at HadesHawk@hotmail.com

Microsoft Visual C++ Runtime Library

Buffer overrun detected!

Program: C:\Westwood\Renegade\Game.exe

A buffer overrun has been detected which has corrupted the program's internal state. The program cannot safely continue execution and must now be terminated.

OK

Use the search function on the forums, if that fails, type this into google.

site:www.renegadeforums.com Buffer overrun

Try downloading this:

http://www.completelyfreesoftware.com/vb_runtime_files.html

I searched and couldn't find anything usefull other then that.

EDIT: maybe this can help you:

SimslerThe solution is:

- Download PCBugDoctor version 1.0.0.4 (you will find it with google.at)
- install it
- register it with a correct name and correct s/n (you will find them in the internet too)
- Run PCBugDoctor and and klick "start scan now"
- The programm will find some bugs and you can klick "fix errors now"

Now renguard should run without any problems. It's possible, that a few days later the problem will occure again, then run PCBugDoctor again. (In any case you should run PCBugDoctor every few days. Your PC will thank it to you)

Please write me an e-mail, if this solution has worked
