well if we had access to the WOL code maybe we could, but we dont so unfortunatly no, its not possible.

send EA an email about it, I am sure they will send you a standard template reply about how they care about the gamers and will support us for as long as nessicary yadayadyada..... and then never do anything...

even if it could be done renegade needs to be restarted before you can use a map

So, does it ?

Works for me without restarting
