Not sure if this is possible but

I want to make it so when a player enters a zone a private message is sent to him by host that says something that i specify.

Can someone explain how this is done(if possible)

I tried JFW\_Console\_message\_on\_custom but i could'nt get it too work.

Thanks.

I thought jonwil had a huge read-me explaining what script settings mean what. I'm not sure.

hmmm, what you want is currently not possible.

Writing a script to do what you want should be possible though.
