What is up with all the nostalgic mods? I think there is like only 2 or 3 mods that dont try to look like a different cnc game. The others try to take off from the renegade theme....Anybody here want to help me make a Renegade 2?I mean if westwood wont, why not us?We can make bigger better vehicles, more bad 4ss characters and some crazy wicked technologies.Anybody agree? Wanna join me?Here is what I can bring to tha mod:I am pretty good at Gmax models, Great with graphics, good with skins and I am average with leveledit.

Well, i'm not exactly making Renegade 2, but i'm making the Land Air and Sea mod, which adds new vehicles, aircraft, maps and structures.If you want to find out more and possibly help create the mod, email me at: scarface_renmods@hotmail.comThis actually goes for anyone (who is good) and wants to join a mod team. Trust me, this mod will be good. A beta version will be out in about a week.
