Wow what a great response from the renegade community. Any way here is a very quick one I made. Just download the Goto <http://dante.havocide.com/modX/> --> Mods -->gdi_apc_start.zip (299.2 Kb) for the Orc gdi apcwarcraft2ren v.1.zip (1.88Mb) for the restI recommend just to download the gdi_apc_start one because it is the funniest. After downloading the file, extract it, copy the wav file(s) to c:\westwood\renegade\data or where ever you installed renegade.

quote: um.... doesnt warcraft have no boats, so how did u get the dont rock the boat one? Has anyone every played Warcraft 2? the old one on DOS. Well let me fill you in; in warcraft 2 you have the ability to mine for ore in the water and have boat fights.How i got the sounds, there is a sound program called "SFXED95.EXE" that can be found within the warcraft 2 directory. All you

have to do is open up the program listen to the sound then extract them to a directory as a wav file. I also wanted to add in a apache/orca sound human : old guy : Ive got a flying machine , want me to flyim flying (sounds funnier when you listen to it)
