When I load up my map (mountain summit) it crashes to the desktop. Before, my guy kept falling through the ground because it loaded up a old version of my map when it didn't have spawners. Now I fixed that but I still have the crashing problem. Any body have a solution?

Any body have a solution?I seemed to have the same problem, let this be a lesson to you to backup often. Not trying to be mean I doubt if there is much you can do, I know that you were converting it to a mix, are ALL THE FOLDERS STILL INTACT? Always, characters, etc?
