I've been making a map, and I wanted to put the GDI and Nod Communication Centers in the map. Anyways, I noticed that the EVA announcements in the game are all messed up! I tried searching for the files that I can use to replace the ones in the game for the reports, but I didn't have any luck. So, does anyone out there have or know where I can find these sound files. Any help would be appreciated! Thanks in advance.

Can anyone out there help me?   By the way, ACK. Do you mind if I use your Helipad and Repair Facility damage reports for my map? I would be happy to do anything to return the favor.

What are you talking about?I don't own any Westwood structure... Nor can I own the strings they use in the strings database.I'm talking about those wave files in your Country Meadows map. (in .pkg format) You have wave files in that map that have the helipad and repair facilities damage reports. (You know: GDI Repair Facility under attack.) I wanted to know if I could use those. I thought you might have made them. I wanted to use them mainly because the strings for the Helipad in Renegade don't sound right.Also, can you help me with the Communication Centers problem. I was going to use your Comm Centers in my map, but I needed the correct strings for them.
