If anybody knows where I can grab a good nuke skin, could I get a link please? Preferably something firey looking, like this:

<http://mods.moddb.com/gallery/image/13768>

If anyone has anything or can link anything like this it would be appreciated. Also it would be nice to have a pic of it to preview. Thanks.

Why do you have to be a dick all of the time AK?

Anyways to answer your question its not a skin, unless im wrong, but I believe it is a emitter AK made. I admit it dose look alot better than the normal nuke and I wouldnt mind if AK would let us have it wich he wont.

Atleast he's better then you. And he actually got talent.

Maschief, try using google. It will give very much results.

I've looked long and hard with google, and have found nothing actually legitimate, lots of crap like:
<http://www.multiplayerforums.net/index.php?showtopic=4207>

Anyone got anything good?

Skin those yourself Ak?

Anyway, the nuke used in the RA mod is made from emitters. It is totally different from the one used in Renegade. You would need the proper emitter w3d files to replace the one in Renegade. I do not have those files, nor do I know what they are named. You may have better luck asking this on the Ren Alert boards. I know the nuke has been put into Renegade once, but it was a long long time ago.

I found <http://skimmers.cncseries.com/> it is alright, but still can't find a nuke that actually looks like FIRE. They always look like...uh...nevermind.
