what i am looking for is a live feed for web page showing who is in game and what team they are on points dispalyed would be a plus but really just looking for a who is in game prog/add-on/script what have you. Anyone know of anything or anyone think they can make one. thinking this shouldnt be hard add on for bren or blaze. can work thru irc or work directly with sserver

Ever heard of symbolic links?

In -s /www/brenbot /home/server/brenbot/html

I can also think of several ways to transfer stuff.. ie, make a small batch script that copies it every minute
