I'd like to play on wol (I'm a GSAer) but it says that I need to download something from somewhere and I don't know where to find it.

Something about updates I think, I don't quite remember...

Oooh is ACK still running around up in here?

Heh heh.

click Yes to download?

alternatively you can get the manual patch from ftp.westwood.com (not sure of the path, but its on there somewhere)

Nah it just says you have to download the latest and greatest from westwood, and I don't know what it means. I think my WOL is corrupt or obsolete.

latest adn greatest?!!!

does it say something about WOL Shared Internet Components?

if so, install Renegade(without uninstalling), and uncheck everything except for WOL shared internet components
