What do you mean a "building tutorial"? How to make buildings? How to place them in Leveledit? What?

He said building tut, which I can only assume that he's wondering how King Tut (Tutankhamen) was built back in ancient Egypt.

My dear boy, he was built by the same method you were - sexual intercourse!

Oh ACK.

I needed a tutorial for standard buidlings for my maps. I don't know if it's done in Level Edit or RenX..

Man SuperMidget, you tried to get one from me like 6 months ago.

Still havent figured it out yet?

Well i have been wanting to be a Mod Forum Moderator for awhile, so this would be in the right direction. Im still on dial-up for a few days, CitCom hasnt installed our broadband yet so this will have to be images only.

I know you've been here for awhile, but im going to treat this as if i were talking to someone with no experiance what-so-ever. this is not to insult your intellegence, but to ensure everything gets across.

working as of right now.

Ok first things first.

Goto: <http://www.oblivionabre.com/RenInstall.html>

Follow the instructions for "People who need to start modding:"

Note: I often use "~" as a symbol for "Next" or "Then"

When all is installed goto "C:\gmax\gamepacks\Westwood\RenX" and right-click the link called "RenX" ~ Send to ~ Desktop(create Shortcut)

Should look similar to this on your desktop:

Double-Click the link ~ If it asks for a serial, simply register at the link thats provided on the window.

Now download "Sectors Example.gmax" from my attached files. Save it to your desktop, and in Gmax goto File ~ Open ~ (Your Desktop) ~ "Sectors Example.gmax"

It should look something like this:

Now goto "C:\Program Files\RenegadePublicTools\LevelEdit"

Right-Click Leveledit.exe ~ Send to ~ Desktop (create shortcut)

Double-click the new link, and when it shows this:

Hit "New" ~ Name it "tutorial work" ~ hit "Ok"

when its finished loading, you should just see a blue. Go back to Renx and hit File ~ Export ~ Goto "C:\Program Files\RenegadePublicTools\LevelEdit\Tutorial Work" and Save as "Sectors.w3d" ~ Set the next window to "Renegade Terrain" and hit ok.

Switch back over to LevelEdit and do this:

Ok thats all of part 1, im still working on part 2. Uploaded in a few minutes.

As always bro, you rule.

And I haven't been trying, I've been playing Diablo 2.

Ok so you should see this on your screen:

You should now see how RenX is depicted to LevelEdit. Also you can see some scale now.

On my RenHelp tutorial <http://renhelp.co.uk/?tut=61> i have the building files with proxis.

Direct Link: [http://renhelp.laeubi-soft.de/Tutorials/Oblivion/TUT\\_Proxis/ /buildings\\_prox.zip](http://renhelp.laeubi-soft.de/Tutorials/Oblivion/TUT_Proxis/ /buildings_prox.zip)

Extract the Gmax file "Buildings\_prox.gmax" in the zip and Repeat (The gmax part of)Part 1 with this Gmax file. Name the LevelEdit temp and the .w3d "Buildings"

Take note where the words "Sector 3" "and Sector 4" are, move your camera around to a similar station to show your GDI buildings.

This will get you to the point where you can follow my other tutorial with no problem.

<http://renhelp.co.uk/?tut=59>

Any questions just ask me here, email me, Pm me, or Yahoo me. Also remeber me on nomination day
