My largest program by far is ...."Far"

She is my voice commanded system helper. Plays music/video Rewind/FastForward by seconds or minutes. Random songs, etc etc.

But most imortantly she can learn new task by voice commands. I was surpsed to see that my VB6 code took at total of 107 pages in MsWord 2003.

```vb
Label1.Left = 0
Label1.Top = (Screen.Height / 2 - Label1.Height)
If NumOne > 12 Then
NumOne = 1
NumTwo = NumTwo + 1
End If
If NumTwo >= 12 Then
NumTwo = 0
NumOne = NumOne + 1
End If
NumTwo = NumTwo + 1
Label1.Caption = NumOne & "x" & NumTwo & "=" & NumOne * Num
Main.OutText = NumOne & " times " & NumTwo & " = " & NumOne 
Exit Sub

err:
Label1.Caption = "Error"
NumTwo = 1
NumOne = 1
End Sub
```
