Try uninstalling and reinstalling Renny again. Make sure game2.exe is deleted when you uninstall...

Next time if Renegade screws up, un-install Renguard before un-installing Renegade. I had the same problem like u did before but luckly i had Norton go-back and fixed it.

I haven't tried Bird's concept so im going to try that.

When you reinstall renegade, make sure you patch it to the latest version before installing renguard.
