WOW. JUST WOW. The reflection used on the coils really make the model. [November 25, 2002, 14:03: Message edited by: Gernader8]

Sorry to (possibly)upset anyone working on the RA mod, but that is most certainly the best model of Tesla coil that I have seen. Awesome

Awesome Except it isn't accurate in the least...It looks quite accurate to me except a little imagination has been used for the base, which in itself isn't a bad thing. Then again my memory isn't exactly what people would call photographic.

Ok, in going from Renegade to TD, neither are:-the refineries-the MCV's-the barracks-the hand-the airstrip-the harvesters-the buggies (debateable)-light tanks-obelisk-humvees (they look like limos to me in TD lol)-and finally Stealth black hands (???)So rather than keep thing completely accurate to the way some people did things 6 years ago (!), why not use a little imagination and better the things that the technology just wasn't around to do.I think it's a great looking Tesla coil, although it could proably use a little re-texturing to make it more "soviet" like.If I were gonna retexture it to make it fit better into the RA universe, I would texture the base red (just the very bottom), and give it a red ball up top, but keep the reflectiveness. Because right now it kinda fits more into the TD universe.but looks friggin fantastic.

Nice model, but did you use another program to render that? I can't possibly believe W3D Viewer or Gmax did that.

----- I wanna let you know that I'm planing
to start a new conversion mod for Generals.I know, the game is not released yet, but I wanna be
ready.The mod name is Generals Dawn.It's based on the first command and conquer (Tiberian
Dawn).To many people, Tiberian Dawn has been the best command and conquer,Generals is the
best opportunity to show that it still rocks.To me , only convert the game to a sort of '3D TD' is'nt
enough, so it will be updated to the Generals way, with a new side,maps, gameplay,generals and
super weapon and also Renegade stuff!Like Dead-6 and many others.You guys will have the
chance to experience the best.Only me in the team is'nt enough to do everything,so I need a
team.I need:A co-leader (a community MPT VIP if possible)A home (a popular or really nice
looking community site)10 VIP beta testers (hehehe)2 mappers (experienced)2 modders (could
be the mappers)1 or 2 skimmers (experienced again)1 or two coder (1 but if he needs assistance,
can ask another one)1 experienced graphic designer1 Bot maker (dante)Since I wanna be part
of the team I'll be working at mapping and modding, maybe coding too.If you wanna be part of this
team or wanna host us email me at aprime1gs@hotmail.com To anyone at PCNC or gamespy, a
chat would be awesome Thanks!I hope that I'll be flooded of application.PS:to the RA->Generals
mod guys , this is'nt competition To Jbvar andto any awesome modellers
