Obelisk walking is a Glitch nimrod. It's just against the rules of most servers because it's unsportsmanlike.

If you join the clanwars.cc and play clan matches for the league, your opponents will be penalised if they ob walk (or break the rules in other manners, or cheat with bigheads and such, etc)

The Renegade Admins there would be the only people who are going to help you out with what people do against you in clan games.

clanwars.cc is one of the most badly layout and hard to use sites I have ever visited

and of course, there's also the fact that if you happen to go on holiday you come back and your account is gone

could be a good website, if they actually put some thought into it...

Then I suspect you're new to this "internet" contraption because it's as straightforward as you want it to be.

Account inactivity for Renegade is 21 days. Winning a cup or winning over a set amount of games makes your clan immune to that deletion (50 for a warrior account, 100 for a clan)

Spell it correctly or get flamed. I can't tell you how many times I've seen someone say "nubs" in place of "noobs" and get corrected.

Actually I was speaking from my experience at writing php websites.

The site does not work properly in Firefox or other netscape browsers, and any decent website would work in all major browsers.

You cannot bookmark the main page of a game section, meaning you have to scroll down the stupid list to find the game you want to go to.

The top menu for the renegade section (and probably the others) is bandwidth heavy, taking a few seconds on my 2mb connection. That probably translates to over a minute for a 56k user to load the menu.

Overall getting to the admin section for a clan takes about 4 pages, when a decent site would let you type your clan name in a search box and go straight to it!

Their 'forums' for clans are hidden away below a load of other (mostly useless) information, so most people don't even notice if you post something.

I could go on, but it would be a waste of my time.

I think you're right... LMSBC using clanwars.cc really would be a waste of time. Last time I clanned against them, we beat them sniping (even though I never snipe) and they threatened to hack us because they lost.

Well when they joined my server and i placed 4 of them on GDI and 3 of my mod/clanmates in my side (this wasnt a real CW)
they ob walked and on hourglass i saw a arty on the hill that was glitching wo hit our REF. after i banned them all and told them we arent gonan CW anymore they said my clan were using bighead (when my server is full RG)

So i suggest no1 even play a clan whos leader is called XDCLeader. plus there servers=lagggg and mods suck balls

Hillcamp in clanners is allowed (though ob walk isn't)

I wouldn't complain too much if you get accused of cheating in a renguard server, since you're always bragging about how you can bypass it

any clan AND i mean ANY that plays at clanwars.cc can beat ANY clan that dosnt. If you dont believe me, play verb (the worst one of them all) and we will still pwn u.

On another note, dan or w.e i use firefox and i dont have problems, ns though. Also the "look of the website" i couldn't careless about it.

1. its fine how it is.
 2. Its a league ffs not a website contest.
 3. Clanwaring > Ladder whoring if you actully get good at it, unlike u people who say "gdi owns because of tib sydney!"

Yes, more or less. Pointpushing is cheating your way up the ranks. An XDC player created a new clan and falsely reported games to XDC from this new clan. He's been banned and XDC is suspended for a month.

I don't have any problems with the clanwars site, and im on Firefox too.
Maybe it's not like omg what a layout? but why need a fantastic layout? (simple but good and it works)it's about whats inside it. As you can see and hear the Manual League the old auto league by far. And yes.. Clanwars.cc Manual clans other clans by far.
If there's a clan in top 3 of Manual league it really shows that they are most likely the best clan @this moment on Ren.
