Hello,

Well my renguard has been working fine for a long time.
After playing some games today with renguard on, I joined another server and this message appears:

So I re-installed Renguard, but still the same message shows up.

What to do?!

Thanks in advance,

T3Mp.

Try joining other servers and see if you still get it

LoL, this makes it even stranger.

When I join servers which I've already played on (today) Renguard won't show up with this message.
But when I join a different server (which I haven't played on yet) I still get the 'cheating message' from Renguard.
