Make sure that you have Renguard installed in the renegade directory and that you let your firewall/router to accept connections from Renguard. Thats all i know since i had these problems.

I think you mean renegade problem, so usually if you try a couple of times it will work. If not just reboot renegade and see if that works.

Sorry for double posting but Renegade still won't go online! The only way I can play is through Gamespy do you think someone like hacked and stole my account?

It could be but I checked it on under exceptions so it should allow it.

Not only game.exe but also game2.exe must be allowed!

It doesn't say game.exe and game2.exe it just say RenGuard and Renegade.
