View Forum Message <> Reply to Message

I have used RenIP to connect in the past even when running RG.The first time it screwed up my RG. I tried using RenIP again just the other day and it messed it up againg.

Now everytime I try to start RG.....

Any thoughts....

Load up Renegade IP as you normally would. Then, before you would usually click "Connect", come here and tell us what the text under "Server Port" is. For example, if I wanted to connect to my clan's sniping server, I'd select that from the saved list, click "Load", and then the line would be:

c:\westwood\renegade\game.exe +connect 67.18.253.100:9124 +netplayername "myname"

I know how to use RenIP just fine, Im no noob. The problem is every time I try to use it my RG gets messed up. Now I can't start RG at any time at all not from RenIP not from Gamespy not from the icon on my desktop.

I tried reinstalling everything and it did not work. I will try again.

Your missing MY point. When I used RenIP to point at game.exe(RG duh) after a few games I connected to with RenIP RG started giving me that error everytime it started up.

This has never happend before, only when using RenIP. Now I can not start RG at all. I can't use RG. Everytime RG starts I get that error.

I reinstalled everything twice and it still gives me that problem. If I give you the error report my computer written for microsoft would you be able to tell me why RG is getting that error?

Please BHS. Can you help me? I tried just ebout everything except reformating.

I uninstalled the game and RG. I deleted some things from the registy then cleaned the registry with a program. I Restarted computer. Nothing. This is pathetic. Help me ffs.

It works fine for me,Ive never had any problems with Renguard and Ren-IP.

However if you have the Hacktool.rootkit. problem, then it may be the bug that is preventing you from playing.

View Forum Message <> Reply to Message

-Sigh- I have said it a million times. I do not have the hacktool.rootkit problem. I was one of the 1st to solve the problem for myself with Norton 2004.

This is a NEW problem. Now I can not run RG. All because RenIP messed it up. I have used RenIP before but it has never messsed up RG that bad. The last time I was using RenIP it made it so RG only show white in the window unless I maximized the RG window.

Now I start using RenIP again. Now this happens. RG does not want to work any more. I Uninstalled RG. Uninstalled Renegade. Removed my renegade folder. Cleaned my registry with 3 different programs. Then I manually searched the registry for certain strings to delete and deleted them. I restarted the computer. Reinstalled Renegade(No skins/mods/cd cracks) Installed RG. And RG still doesn't want to work.

Please if you can help me BHS help me please. RG always used to work for me.

Also I was wondering if it was possible I got banned but that can't be because it would say I got banned wouldn't it?

Please check if I am banned. Also come up with a few suggestions for me.

Also look at the attached file. I don't know if it will help but it was written for an error report.

I just wan't to get back on RG.

Wow. This sucks. So your saying you can not help me?

I still have not found the solution but I will try one more thing. Hopefully it works.

I tried reinstalling windows. Did not work. Im am ****ing pissed.

Is there an older version of RG I can download and then update? It could possibly work.

Does RG work when you start it directly without using RenIP?

Also, why would you think you're banned? Have you done anything that would make you think we would ban you?

View Forum Message <> Reply to Message

Renguard does not start at all. I removed RenIP after it caused the problem. Then I reinstalled RG several times. I reinstalled the game a few times. I cleaned my registry a couple times. All until I uninstalled Renguard, Renegade, Deleted the Renegade folder, cleaned my registry with PC Repair, Registry Fixer 4.0 and Registry Mechanic. Then I reinstalled windows. Still did not work.

No somebody else asked me if I could possibly be banned(your not the only guys I came too for help), so I asked you. I didn't do anything to get banned.

The reason why nobody has a clue how to help you is nobody's ever seen this problem before (i.e. you are in uncharted waters)

View Forum Message <> Reply to Message

I am going to cry ffs.

Is there an older version of RG I could try? Since it would not be the same exact thing, maybe the computer won't reconize it and strike that error becuase I think something external is the problem. I don't realy know wtf I am talking about but it could work.

I downloaded Renguard 1.0 today. That did not work either!!!!!!

RG WONT WORK ANYMORE

View Forum Message <> Reply to Message

If your still using Norton then that probably has something to do with it.

Try a different antivirus. Your solution to the Hacktool.Rootkit problem may not have actually worked.

omg noooooooobs

my solution DID work. and i trshd norton right away.

this has NOTHIG to do with the hacktoolrootkit problem

shheeeesh. i dont think anybody can help me :'(

Are you sure you didn't do anything to be banned? Based on your screen shots, it looks like you downloaded a RenGuard bypass. It's been known to do really bad things to people's PCs. I would do a LOT of virus scanning right away if that's the case. Who knows WHAT that thing did to you.

Note that this is not confirmed information, just stuff I've heard through the grapevine.

I beg to differ... does "gamee.exe" ring a bell? Searching your name on RenGuard logs brings up a long line of cheating attempts, even back to June 29, 2005 when you tried to use an objects.ddb hack on the UNRULES New Maps server.

Yes I know Crimson. Was a long time ago though. I was one of those Westwood Online noobs who tried downloading cheats asuming they would work. I got banned by you I think it was. Then I made one of those threads with some lame excuse. Then I relized how dumb I was being and I grew up PMd you and begged your forgiveness and then promised I would never do anything again(and I didn't). It was quite the PM and up to this day I am gratefull for your justified actions of banning me and then trusting me and letting me on. That was one memory I will never forget.

However now I am to old to cheat and I know very well it gets you nowhere so I dispise all cheaters but I also forgive the ones who deserved to be forgiven.

I just want to get back on RG ffs. Does not look possible as I have tried EVERYTHING :'(

EDIT: Sorry for the run-on sentences.

Sorry for bringing this thread up to the top of the list. Yea and I now use the name <~SI~>RC22Fires. rc22fires I used on WOL when I messed up and downloaded that bypass. We straightend that out, surpised you forgot Crimson.

I formatted. I am now happily a Renguard user again.

Edit: Tnx for the help guys.

makes this reply to crazyfullas post on the UN forums about being banned from Renguard a bit of a joke doesnt it

Quote:I don't like @$$h0L3z like you. You lie to everybody on this board and the only shame you had was because you were banned. Not because you cared that people knew you were guilty. Now that you resolved the issue(Unbanned) you think everything is good as new. Well your wrong. You just lost everybodys respect on this board.

I feel I did the wrong thing by posting my good advice earlier. I would much rather of added my 2 cents on the renegade forums and flamed the schnitt out of you like the noob you are.

Just because you did not apologize or show the slightest bit of guilt or remorse I wan't to remind everybody that people like you can not be trusted and can not be forgiven.

Enforcer please. I messed up a long time ago and paid for my mistakes. I am sorry for them and never made them again. The only time I lied about it was when it first happend and I didn't know the mature thing to do. I am not a liar or am I a cheater.

The thing I was most upset about with crazfulla is not that he cheated at all. We all makes mistakes. Some people just get curious and bored and then mess up. But what bothered me the most is when he posted on the =[UN]= forums and lied to us all and asked us to post our support. Then never apologized about lying in the first place, he wanted us to get him out of trouble. He then did not care that he used cheats and then he changes his story to "i was testing cheats".

I never once was upset and felt that if he cheated he is a badguy, but what he did afterwards makes him a badguy.

I am not a cheater and that bypass thing goes back along time ago. As far back as when I got banned by floyd for swearing on the server and at him. Beleive me if I wasn't the stupid noob I was back then, then I would have never done those things. I don't want you to take my word for it as you probally think nothing I say is credible and I understand and am ok with it. But I am not a cheater. I don't have a bypass and was not banned on rg(Well was but fixed forgiven afterwards(Not recently basically)).

Yea and that problem, I still don't know wtf caused it, but it was fixed with a simple but not what I wanted format.
