
Subject: Invalid file Game2.exe, Disconnecting from server

When I start up RenGuard, it will go through the list of files, all of them being good, then it finds a Game2.exe file and says it's bad. It removes the option of starting up Renegade.

When I tried to delete the file, the next time I started up Renegade it said, "Could not find game".

That would be because you just deleted the actual exe to start renegade.

Re-install and dont forget to update to the 1.037 patch before installing renguard.

Where can I get the 3.037 patch from?

1. Un-install Renguard.

2. Delete both Games.exes in your Renegade folder.
3. Download this No-CD crack.
4. Put the Game.exe in your Renegade directory.
5. Re-install Rengaurd.

Try this, if that doesn't work then it's something with RenGuard itself.

I combined my two game(2).exe files and edited all the shortcuts so they send it to my gamex.exe. Which also is the No CD crack, and that works.

I've had the same problem.
