Now I don't want this to be mean, but seriously, do people have no common sense?

Anyway, to be nice, here is what you should do.

- 1) Uninstall Renguard.
- 2) Uninstall Renegade.
- 3) Delete any files that were left over.
- 4) Install Renegade.
- 5) Install Renegade Patch.
- 6) Install Renguard.
- 7) Install CP1 if you wish.

Enjoy.

Doesent RenGaurd come with CP1?

ratchet27 wrote on Sat, 29 October 2005 14:12 i download renguard a long time ago and then i took renegade out and then put it back in and when i play online it says i need to put renguard but when i go to donwload it agian it say i already downlaod it and if the preson who made renguard is reading this then plz plz plz plz plz plz plz plz make a renguard 2.0 or tell me what i did wrong

But seriously, use common sence. I mean, if Renegade & RenGaurd isnt working, the first thing I

---

would do is reinstall RenGaurd & Renegade

seriously I would use Common sense and post this topic on the correct board....

But I had that same problem a week ago....just do as the others say, uninstall everything user CP add/remove programmes, make sure all the related files are gone, then reinstall Ren, repatch it, Redownload RG and reinstall that too.....sorted!

AADude7 wrote on Sat, 29 October 2005 17:25Doesent RenGaurd come with CP1? Not with the stand-alone CP1 installer. Conversely, a fresh install of RenGuard will ask you if you want to (download and) install CorePatch 1.
