Hello, well i have noticed that sometimes if im in a server while using RG and my net dies (which is normally does) and my IP changes i cannot rejoin any server, when i load RG i join the game then RG pops up saying error with game.exe,(You've been kicked for XxX for cheating, edited game.exe) and the only way i have found to fix this is to keep reinstalling RG, which sometimes can be a pain in the arse.

Will this be fixed in the new version, if not,can it be fixed asap?

It will be fixed soon. In the mean time, a workaround is to disable automatically launching Renegade and waiting about a minute or two before manually launching Renegade.

Ive done that, and the only whay i have found to fix it is to Reinstall RG.. Which sometimes can be annoying..

Thanks Mac for cleaning this up.
