Hello,

after trying to download the "no more gameplay pending patch" I found out that by me server.dat
is missing. This explains why I always get the "Requesting server list" when i try to start up
Renegade.

Can someone place server.dat here and the path where it belongs?

Thanks,

Prulez

this is the original server.dat and it belongs in renegadeFDS/server folder same folder as your
server scripts.dll are in.
