The screenshot shows the GameSpy Arcade 2.0.3 interface. On the left is a navigation menu with buttons for Home, Servers, Files, Demos, Chat, and Arena. Below this is a 'YOU ARE HERE:' section for 'COMMAND & CONQUER RENEGADE' showing 101 players and options to invite or add buddies. A 'My Games' list includes titles like 'MIDDLER HONOR' and 'COMMAND & CONQUER RENEGADE'. At the bottom left is a 'Parlor Games' section with 'Poker' and 'Spades'. The main area displays 'All Renegade Servers' with a list of server names and a '73 / 73 serv' indicator. A 'Blackhand Studios Core Patch Downloader' window is open, displaying the following text:

Blackhand Studios Core Patch Downloader

Core Patch 1 Introduction
=====

From the Creators of RenGuard, Blackhand Studios(tm) proudly presents "Core Patch One". CP1 is the first unofficial C&C Renegade update which fixes several bugs identified in the game. Many fixes and changes were made to the original maps including additional sounds, more effective vehicle blockers, prevent wall jumping, and other special effects. The much hated ability to do base to base attacks on certain maps has been prevented. Multiplayer radio command icons are now available, Obelisk power will be audible, seamless interaction between the Renegade client and the Free Dedicated Server will introduce server-side enhancements that make available the best effects ever achieved in Renegade multiplayer gameplay.

The people who have been eager to play the best Fan-made maps available at this moment haven't left out. Six incredible maps, C&C_FieldTS, C&C_Gobi, C&C_Sand, C&C_MutationRedux, C&C_Siege, and C&C_Snow are all available through this update. Gobi, Sand, and Snow were among several maps intended to be released by Westwood Studios, and through the efforts of prolific level designer

Options

Failed : 416 Requested Range Not Satisfiable
Check network connections, close the program and try again

At the bottom of the window are checkboxes for 'Hide Dimmed' and 'Cursor Highlight', and buttons for 'Delete', 'Hide', and 'Close'.

#1) Be more patient. We don't have people waiting for others to have problems just so they can reply in 30 seconds.

#2) Are you behind any sort of proxy or firewall?

When your in Rengaurd press the the "options" button, then do "disable core patches".

Then manually downloa the Core Patch:

http://download.renguard.com/standalone_cp1.zip
