I'm having trouble with LevelEdit:

<http://i112.photobucket.com/albums/a242/ma1kel/clp1.jpg>

As you can see there are no .tga files and presets. What must I do? I tried re-installing but that doesnt work.

Im most cases that means your Objects.ddb is'nt in your Mod folder.
When creating a new mod folder LE should put Objects.ddb in there for you although if for some reason its not.

Try extracting Objects.ddb From Always.dbs with xccmixer.

And put it in your mod folder.

Hope this helps.

That is a very bad idea and will most likely create corrupted, uneditable presets. Copy objects.dbs and conv10.cdb from c:/program files/renegadepublictools/ALWAYS/presets and paste them in your mod package folder under presets.

That will fix your problem.

Create a new level, then exit Level Edit, then open Level Edit again, and open the mod/map.

Try uninstalling the tools, deleting the directory, then reinstalling.

I already fixed it, looks like some registry files became corrupt.
