Could you make sure to ask EA to make the Ren-serials of the decate - package compatible with Gamespy? Cause the serials of the battle pack weren't and that's just robbing the people who bought it (including me ofcourse)...

Tx!

Well, it just sounds like it didn't like your serail. It probably should have worked, but for some reason it didn't.

I doubt that's possible but who am I to know that?
The first couple of thousand games? Were registerd, and all that was made after wasn't?

Also since they claim to have all games in that pack Why not add Sole survivor! Not that I have to play it, I just want to have it.

Actually all persons I know who bought the pack, can't play at gamespy. Pretty annoying. Better prevent this...

Or could someone just PM me Apoc's mailadress so I can ask himself?
