New problem with RG? I have been playing like normal, was in a RG server (Jelly-Serve) playing probably over an hour today, got kick from the server because I disconnected from Renguard and it said this when I tried to go back in:

[10:34] Unauthorized file game2.exe has been found in your renegade directory

[10:34] Unauthorized file game2.exe has been found in your renegade directory

[10:34] Disconnected from RenGuard network

Obviously I use the no-crack like 100's of others. Is this just a temporary issue or?

You could ofcourse always re-install RenGuard, by uninstalling it and removing both EXE files from yuor Renegade folder and re-downloading the No-CD Crack and RenGuard.

I was hoping it had something to do with some activity on Renguard and was only temporary. Also hoping one of the developers could answer what they thought.

But as it turns out, I simply removed game2.exe and replaced it with a copy that I had and it fixed it. Have no clue what happened.
