Windows is probably hiding it from view.

Start RenGuard and minimize it.

Right click on your taskbar, and select "Properties".

At the bottom, if the "Hide inactive icons" box is checked, then click the "Customize..." buttons next to it. If the box is not checked, then I don't know what the problem is.

In the Customize Notifications window, look for "RenGuard 1.03" under "Current Items". On the right, make sure that it is set as "Always show".

Click OK, then click "Apply" and then "OK".
