Hi i posted a while ago
with the same problem i uninstalled everything even ServicePack2 on my comp reinstalled
Renegade reinstalled Renguard and still get the same message what is up:(

I was just palying on Xphaze 28 marathon
and got banned for not having Rengaurd:(tha was weak
i get this message ERROR VERIFYING STARTUP PARAMETERS some1 plz help me

Chank You Much for ur time

<http://www.renguard.com/faq.php>
Quote:I'm getting the message: "Error verifying startup parameters"
You may get this error if you have Renegade installed on a drive other than C or over a network
drive not physically located in your machine.

Do you have any other hard drives in your computer? If you do, then try installing Renegade and
RenGuard to one of those drives instead.
