A fair few of my players are getting 'CD Authentication check failed' on the server when its in GSA mode, I've done a reinstall but it still happens, it happens to people using GSA and using a server launcher/reconnect/renip

Anyone else had this issue before?

Yup, they all bought the battle pack that includes RA2, YR, Tib Sun, Firestorm and Renegade. Those serials have not been communicated to gamespy, hence they (and I) cannot play using gamespy or ASE.

And strangely, although I bought the bundled pack as well, I don't have this problem...
