Yes its another one of my maps again but i think this one is a bit different. Its another very original idea and you guys might like it. Remember there are no invisible walls so DONT FALL!

Overall it's a pretty good map. I played around in it for a quite a while by myself just to pinpoint some of the bugs and areas that could be improved. I think its a great concept for a map though, so GJ.

Two things I forgot to mention in the SS below are - maybe since we've got a gloomy sky in the map, you could add some effects such as rain and lightning, like the stuff from the second SP mission (Rescue and Retribution).

-Im gunna fix the texture strethcing.

-I need some help with shading and all that sorta stuff.

-The water does have a water texture but for some reason it uses the fog colour instead.

-The mid air things are supposed to be like that. Makes it look more unreal and imposible. (thats why its a video game.)

-Unless i change the AGT weapons i cant fix that problem. Not sure what to do. (This is when someones opinion comes in handy.)

-I will totally replace the tiberium thing in the side with something less eregular and smooth.

-Originaly it was going to be a fling map but i just dont think it suits this map. Anyway there are

plenty of good non-flying maps that have ramps and stuff.

To fix the shading, just make sure you do this and those dark spots should be gone:

As for the water, make the water plane have a few segments (polygons) and then it shouldn't do that.

I like your idea, but you just need to work it out a bit better.

I am also looking for unique types of maps, I already made some 'chaos' type maps (big maze, invisible paths, ect) and a jungle map where everything takes place high in the tree's. And don't fall as there aren't any blockers... The chances that you fall are larger there then on your map.

I am also working on challenging maps where, for example, you have to get to the top of a tower which has lots of traps and objectives, and just place the beacon on the ped for your team to win.

And a small map with 1 weapon... Of which the ammo can go anywhere, well it's 90% random, it seems to like going up a bit faster then going down, and the speed is always the same... But it's fun with friendly fire on.

And more...

I'd download it and play it, but I have no idea how to play maps without anybody else in them

Multiplayer Lan then Host game then set Playercount to 1

Should work

That's looking good. Keep learning and you will be able to make some awesome things, not to mention the knowledge will stick with you the rest of your life.

If you plan on being a game designer someday, now is a better time to start then ever.
