We need more information, things like your pings, what type of internet connection you have, which servers you are connecting to, and possibly screenshots.

What do you mean i get disconnected...

You get disconnect from your internet, from renegade, RenGuard etc..

i keep getting kicked from the servers in multiplayer. ill get kicked from any of them, ill play a little to see what the message it gives me is. i can usually re-join the game, but its annoying getting kicked and having to re-join three or four times a game. i cant really say i know what a ping is, and im using comcast internet.

In-game, press F8, then type FPS and hit enter.

That will show you your ping, Frames per Second, Server Frames per Second and KBPS.

When you start to disconnect, take a screenshot and show it to us, if your ping goes to 9999 (or anthing above 1000 and keeps rising) then there is a problem with your lag, I had that when I was

on dial-up.
