How come whenever I try to DL something from there I can only seem to DL "Index.html" and not what I wanted?

You can't "Open" the files from Dante's Mod Exchange, you can only "Save" them in your HD. In other words, always click on "Save Target As", since the "Open from it's original place" doesn't work with files from DME.

DeafWasp, you've been a little cocky lately. Like your on a power trip or something. Everyone
your calling a n00b isn't, and just cause they haven't made contributions since you've been here
doesn't mean that they didn't help lift modding off the ground. There are those of us who have
been around since before the mod tools, when we had to figure out drop scripts. So just
chill.~Bumpaneer [December 02, 2002, 16:38: Message edited by: Bumpaneer]
