My ranking/profile stats have been stuck for a long time. Is there anyway to reset them or atleast get them back to working?

Yes cus im just an asshole who wants to rub it in. More like i just want to fix it.
Am I the only one or is everyone else having this problem too? It just started a week or so ago.

It started when XWIS took over.

I am guessing this is because XWIS do not support a Renegade ladder, so therefore it is not supporting stats and rankings for Renegade either.

Long story short, XWIS is the server that runs all Westwood Online-compatible games(particularly the Command & Conquer series). As such, the original Renegade ladder service is no longer available. If there are plans to repair this in-game function, I sure as Hell don't know about them.

XWIS said they were going to sort the renegade ladder out, they've been for all intents and purposes in charge of Renegade for about three months and there's still fuck all about Renegade on their website (which I think is incredibly sad), so don't get your hopes up.

The only ladder you can use for individual gameplay is an internal server ladder. For clan gameplay, <http://www.clanwars.cc/?League=41>

XWIS is just as bad as EA, but at least EA didn't give us false hope.

I gave up hope about the same time Olaf dissapeared from these forums.

Looks like we are on our own kids. No change there.

Is the Renegade community itself not capable of creating a ladder system?

We don't just want a ranking system, we want the official in-game ranking system. I have no idea how that technically worked. Didn't EA give you the stuff needed to run it?

If you don't want to set it up yourself, I'm sure someone here is willing to help you with it.

We are, but we need to do it trough XWIS because Renegade supports that.

Quick question. When you were asked three months ago whether XWIS would make a Renegade ladder and your admins said yes, how long will it be before you're finished?

Or rather, how long until you've started?

...or until you're thinking about starting?

Never mind, I think the post I quoted here answers my question.
