Download from <http://www.sourceforge.net/projects/rentools/>

This fixes a number of bugs in the 2.2.1 release including a major one that will be triggered in certain circumstances when a character is purchased (including when you trigger the "get into a vehicle and access a PT at the same time" issue). This bug will be fixed on any clients who download 2.2.2 and use it (regardless of what the server is running)

Anyone using 2.2.1 (on the server or client) should download this release and start using it.
