I cant install the cp1, i was messing around with mods and i messed up bigtime. Because when I try to install the standalone cp1 it says 'Old file not found. However, a file with the same name was found. No update done since file contents don't match. o.O

Can you help? I seriously don't wan't to reinstall the game if there were an easyway out.

EDIT: The message apear when trying to update 'scripts2.dll'

That isnt true.

If it gets to the scritps2.dll part and it's saying file not found then replace the scrips2.dll whith the original

That would be the file that is needed.

Any more files that cant be found post it here and i'll upload it for ya.
