I am have started making skins for my renegade and been making them public for a few testers, now for loadscreen rengaurd displays that CorePatch1 text about the new maps and different links, how do you removee that?

It weird tho, I have CP1, and everything, but my loadscreen is still that old default one..

Could you try to explain your question in another way? I can't understand what you are trying to say.

How do I take off the CP1 text that appears on the loadscreen after you install the update?

He wants to know where he can find the loadscreen and put the original back.

Don't make fun of him for not being able to speak english well if you're equally as bad at comprehending it.

He has the default loadscreen with the CP1 text written on it, and he wants to remove the text.

He has the default loadscreen with the CP1 text written on it, and he wants to remove the text.

Exactly, now the question is how do I do that? Where is that file found?

the loadscreen has 5 image files;

```
loadscreen_beam.dds  
loadscreen_cnc_1.dds  
loadscreen_cnc_2.dds  
loadscreen_cnc_3.dds  
loadscreen_cnc_4.dds
```

Remove all of these and you should have the original background back..

But none of these actually have the text in, so I guess it must be stored in strings.tbd...

EDIT: nvm, tried removing strings.tbd and still had the cp1 text...

anything added in CP1 is probably in always2.dat, try looking there.

If your trying to edit the text then all you have to do is open up stylemgr.ini in your renegade data folder and make it look like this:

Quote:;

```
; STYLEMGR.INI
;
; This .INI file defines the fonts used by the WWUI library
;
```

```
[Font File List]
File01=54251____.TTF
File02=ARI____.TTF
```

```
;
;
; Font names follow this format:
;
; <family_name>, <point_size>, <is_bold>
;
; is_bold is 0 for false and 1 for true
;
```

```
[Font Names]
FONT_TITLE=Regatta Condensed LET, 52, 0
FONT_LG_CONTROLS=Arial MT, 12, 1
FONT_CONTROLS=Arial MT, 8, 1
FONT_LISTS=Arial MT, 8, 0
FONT_TOOLTIPS=Arial MT, 8, 0
FONT_MENU=Regatta Condensed LET, 32, 0
FONT_SM_MENU=Regatta Condensed LET, 20, 0
FONT_HEADER=Arial MT, 9, 1
FONT_BIG_HEADER=Arial MT, 12, 1
FONT_CREDITS=Arial MT, 10, 0
FONT_CREDITS_BOLD=Arial MT, 10, 1
```

```
FONT_INGAME_TXT=Arial MT, 8, 0
FONT_INGAME_BIG_TXT=Arial MT, 16, 0
FONT_INGAME_SUBTITLE_TXT=Arial MT, 14, 0
FONT_INGAME_HEADER_TXT=Arial MT, 9, 1
```

```
;
;
; Audio entries follow this format:
;
; <wav_filename>, <volume>
;
; volume is a non-normalized percent from 0 to 100
;
```

```
[Audio]
AUDIO_CLICK=interface_mouseclick.wav, 60
```

AUDIO\_MOUSEOVER=interface\_rollover.wav, 70  
AUDIO\_BACK=interface\_escape.wav, 80  
AUDIO\_POPUP=interface\_alert1.wav, 80

That should make it look like original text, I think.

AUDIO\_POPUP=interface\_alert1.wav, 80

That should make it look like original text, I think.

My stylemgr.ini already looks like that, is there anyway to directly change/edit the text?

I got the old text back by replacing strings.tdb in the data directory with the strings.tdb in always.dat.

I dont know much about modding or how renegade works so doing this might set your computer on fire. Well it worked for me.

If you want to CHANGE the text, open Leveledit,  
create some mod package like "test",  
go to Strings>Edit Table,  
Click the "LOAD" tab,  
and edit the things you want (see pic).  
THEN, copy the strings.tdb out of the mod package's directory (for me it was C:\Program Files\RenegadePublicTools\LevelEdit\test\ALWAYS\TranslationD B\strings.tdb)  
and paste in your data directory (overwrite old one).

I just re-tested both methods and they worked for me...

Someone correct me if i'm wrong.
