I am getting sick of this

I use windows 2000 when renguard is loaded I get buffer overrun Error. so I can not use renguard lately these childish host are kicking me and other people every time we logon. I have tried to explain the problem, the they come back and say too bad

I PAIDED FOR THE GAME. SO THIS IS BECOMING A PROBLEM NOW

HOW CAN THIS BE SOLVED. I THINK ADMINIS THAT DO THIS SHOULD BE REVOKED. AS THIS IS CHILDISH

HOW DO WE GET THE MANE OF THE HOST WHEN THE KICK US.

Firstly, you can't get their names. But you can get the server name, wich is just as good.

Secondly, You might have paid one time for this game. But the hosts are paying every month an amount of cash for there servers that is alot more than Renegade is worth now. They have every right to want to be 100% secure about there not being any cheaters on there servers.

There are still some non RG servers, you just should look for these. I'm sorry RG doesn't work on windows 2000.

That comment alone is misleading, but anyway.

Look for servers that don't have [RG] in their name, there are some good ones out there that don't require it.

You can also join Half Renguard servers with no problems. The buffer Overrun has nothing to do with windows 2000. I run Windows XP and get the very same problem. I have just simply given up on running RG. Try playing in n00bstations or n00bless or n00bstories is still half renguardg I believe.

The buffer overrun might happen on windows XP but it always happens on Windows 2000

The best thing I can suggest is go to the hosts' website and if they have a forum (they likely will), explain your problem and mention that windows 2000 users cannot use renguard. Maybe the server owner will allow you on the server.

I don't think it's fair either that people cannot use renguard and hence can't play on quite a few of the servers on XWIS but a lot of the servers have renguard in that you'll only be made to use it if you get suspected of cheating...a healthy explanation on the server's forum is the best course of action to take..

Also, the kicks you keep receiving might be automated, not always somebody seeing you and kicking you.

with RG 1.04 the buffer overrun should be solved, and you will be able to run RG and will have no problems.

Until then stick to the half-rg servers. The Koss2 servers are half renguard, and the admin's don't kick simply for not having RG running

Quite a few Half-RG servers will force you if you play well enough to be suspected though.

Of course, you do realize that the "I paid for it" arguement for playing multiplayer games doesn't amount to much as there is a single player option. That about covers any arguement about not being able to play it.

If you want to play on our half-RG server (a00000002, www.thekoss2.org) there should be no problem. If you want to be even more sure, come to our forums (www.thekoss2.org/forum) and explain your problem. We will then make sure you OR play normally, OR get !kickban 'ed if we have serious suspicion. But there will be no !forcerg .

The general rule of thumb on UN servers is that if a player is forcerg'ed by 3 players,then he must use renguard on that name
a general plea in the forums here <http://unclanforum.proboards16.com/> MAY get you unforced,but

that is doubtful due to the foul mouth pages

received from you

this was earlier this month

[02:12:05] [02:14] <NEWMAPSBOT> 14Host: [BR] RenGuard User riku5464 suspects that iamvistec might be cheating. 2 remaining RG users required to force iamvistec to use RenGuard.

[02:12:05] [02:14] <NEWMAPSBOT> 08ih8u : !FORCERG IAM

[02:12:05] [02:14] <NEWMAPSBOT> 04KiwisRULE!! : !forcerg iam

[02:12:05] [02:15] <NEWMAPSBOT> 14Host: [BR] RenGuard User KiwisRULE!! suspects that iamvistec might be cheating. 1 remaining RG users required to force iamvistec to use RenGuard.

[02:12:05] [02:15] <NEWMAPSBOT> 04bozoinabox : FFFFEUJH

[02:12:05] [02:15] <NEWMAPSBOT> 08ih8u : !forcerg iam

[02:12:05] [02:15] <NEWMAPSBOT> 14Host: [BR] iamvistec will be forced to use RenGuard from now on.

[02:12:05] [02:20] <NEWMAPSBOT> 9[Page] iamvistec: would you fucking stop that renguard causes buffer overrun error on win 2k systems

[02:12:05] [02:20] <NEWMAPSBOT> 9[Page] iamvistec: stop that

[02:12:05] [02:20] <NEWMAPSBOT> 9[Page] iamvistec: stop that

[02:12:05] [02:21] <NEWMAPSBOT> 9[Page] iamvistec: stop that

[02:12:05] [02:21] <NEWMAPSBOT> 9[Page] iamvistec: stop that

[02:12:05] [02:21] <NEWMAPSBOT> 9[Page] iamvistec: stop that

[02:12:05] [02:21] <NEWMAPSBOT> 9[Page] iamvistec: stop that

[02:12:05] [02:21] <NEWMAPSBOT> 9[Page] iamvistec: stop that

[02:12:05] [02:21] <NEWMAPSBOT> 9[Page] iamvistec: stop that

[02:12:05] [02:21] <NEWMAPSBOT> 9[Page] iamvistec: stop that

every few weeks Alkaline resets bans and forcerg's

then you were forced by 3 players AGAIN,again you started with the foul mouth pages

paging the server like this will more than likely put you on the ban on sight list,being as there is a no swearing policy on the servers

[11:12:05] [18:55] <NEWMAPSBOT> 14Host: [BR] RenGuard User marvreff suspects that iamvistec might be cheating. 2 remaining RG users required to force iamvistec to use RenGuard.

[11:12:05] [18:59] <NEWMAPSBOT> 14Host: [BR] RenGuard User [UEN]BattleSniper suspects that iamvistec might be cheating. 1 remaining RG users required to force iamvistec to use RenGuard.

[11:12:05] [18:59] <NEWMAPSBOT> 08 [BA]kick : !forcerg iam

[11:12:05] [18:59] <NEWMAPSBOT> 14Host: [BR] iamvistec will be forced to use RenGuard now.

[11:12:05] [19:03] <NEWMAPSBOT> 9[Page] iamvistec: you fuckinf asshole i use win200 renguard odnt work on it stop it

[11:12:05] [19:04] <NEWMAPSBOT> 9[Page] iamvistec: you fucking asshole i use win200 renguard dont work on stop it

[11:12:05] [19:05] <NEWMAPSBOT> 9[Page] iamvistec: wou;ld you fucking stop it

[11:12:05] [19:06] <NEWMAPSBOT> 9[Page] iamvistec: fuck page if you want to know why renguard is not loaded

so simple answer next time your forced either find another server OR just change your name

the server admins are aware of the fact you say that you run windows 2000 but as 6 different players have forcerg'ed you twice

they decided NOT to unforce you, and also due to the foul mouth pages

A PERSONAL PLEA MAY HELP
