While installing the FDS, when it prompts you to enter a serial, you can enter any combination of numbers that is 22 characters long, and starts with 0669!

However, serial validation is active on XWIS. So you will need to:

- Complete the first step.
- Open server.ini
- Replace the serial with any valid serial.

XWIS does not know the difference between client and server serials. Only the original Westwood installers do. So you can use your client serial as server serial.

XWIS does not scan for duplicate serial usages. A single serial may be used for more than one server. Use caution however, if the serial is banned, none of the servers using it will be able to connect until a new serial is used.

Except now XWIS checks for serials, perhaps this should be updated?

This is what I did:

Use a 0669 key to INSTALL the FDS, since it is bound to the 0669 keys.

Open your server.ini file, edit the Serial to my Renegade Serial number.

Then I was able to create my server fine. If you cannot create the game channel still, ensure your username and password are correct.

THANK YOU SO MUCH!
This has fixed my server.

1)Yes, the FDS does check for valid serials, but Olaf said it doesn't tell the difference between game and fds serials so..

2)It also doesn't check for duplicates (aslong as the serial is valid) so everyone can use any valid serial

How are people who want to run their own server going to obtain a valid serial without the request serial thing working ?

Not just for Renegade but also for APB or any other Mod that was released for Renegade.

Are the serials still limited to like 9 nicknames? If yes, then it is nearly impossible to create new servers on XWIS for Renegade or any mod based on it...

I still have maybe 10 valid fds serials that are unused.

But unless they are nickname count unlimited it is useless to even include it with the fds installer..

CHEATERS DON'T GET VALID SERIALS

They only get renegaid

Don't use the FDS then, if you can't figure out the simplest thing then you should not be using it but here's a tip anyways download it and start the file to install it.

When it asks for the serial given to you by westwood enter the code xxxxxxxxxxxx it is a special bypass code given to the renegade community server owners.

Edit by a moderator: don't post serials.

It was not a real serial it was a fake one with just the 0669 in front of it.
