I've had this map working correctly before but recently when it loads up, it just closes Renegade completey. I'm pretty sure I'm missing a file or something. I remeber there being a Strings file or something. I have a few in my directory, but I don't wanna mess with them. Can I get some help with this?

Just backup the folder /Westwood/data. Then remove all tmp files, think of. .thu files and I'm not sure wheter you need the strings.tbd or not. Then try it again, or redownload the map. I've had occasions last one was with Siege where the map download was corrupted.
