I made a NR TeamSpeak Plugin (Still working on) ill just paste the readme here, as I am too lazy to type

NightRegulator TeamSpeak Plugin 1.1 by AmunRa
site:www.amunra.net

~~~~~

Thank you for downloading my plugin, I'm sure you will enjoy it!

First, I will list the current features

pretty much everything that goes to IRC goes to teamspeak

ability to turn off team chat

ability to disable server pages

ability to disable all chat

~~~~~

NOTES:

YOU MUST BE A SUPER SERVER ADMIN TO USE THIS!!!

YOU MUST USE NR VERSION 2.0 AND UP!!!!

~~~~~

Plans for future Versions

ability to message one particular channel

ability to turn alot of stuff off

~~~~~

To install, be sure to make a backup of your current NRplugin.dll, calling it NRplugin.dll.bak

then, simply unzip NRplugin.dll to your NR folder!

Thats it!

~~~~~

---

Im comfused

What does it do?  
And whats the benifits?

seemed pretty nifty to me, more convient than irc  
soon you can used commands on ts as well

---

---

AmunRa wrote on Mon, 26 December 2005 17:10It simply sends everything that goes to irc to teamspeak

Wow. Thats sweet, im getting it, and BTW, can't wait for the commands

Oh, does it work with BRenbot?

[View Forum Message](#) <> [Reply to Message](#)

---

yes, lol

BR 1.41 dousnt support plugins at all!

i no they are coming in the next version though

but this plugin wont work with it

NR plugins have a .dll extention, BR plugins have a .pl extension, if u understand that... lol

[View Forum Message](#) <> [Reply to Message](#)

---

new things up and coming are:

Ability to message a channel and not the whole server

use commands from teamspeak, based on user status

commands the same as the ones used ingame and irc (hopefully)
