a bullshit or what??

guys really dont know what happen with that crap but im not the only who have this message .. Failed to recieve list of avabile master servers. OR your firewall is not compatible Ceckyour internet connection?

fuck man i want play MY game each time i want but your F""RG dont let me ... a fuking solution plz. IS like U FORCE US to USE RENGUARD SO make it WORK FINE fuck.

Thx

Thank you for showing your appreciation of the RenGuard anti-cheating software, you will receive a response shortly from either members of the community and/or the staff of the Black Hand Studios.

Hi Enrique Lobos.

RenGuard has indeed been having a lot of trouble recently, and I'm sorry that it seems to adversely affect you so much. BlackHand Studios has been working as hard as they can to fix these problems while balancing out the work with real life and other duties. Assuming that the "Failed to recieve list of avalible master servers. OR your firewall is not compatible Ceckyour internet connection?" message is due to a problem on BHS's side, please contact them in their support channel ASAP so they can resolve the issue... I'm going to assume that it's not an issue on your end, since you do seem to be able to use it once in a while.

Please be patient while we try to resolve these issues.

You can:

1. Keep insulting and noone will listen to u anymore
2. Ask in a nice way and expect an answer
  - Use game2.exe to play if you keep getting these problems. At the same time, go in the support irc-channel and search for help.
  - Do you have any (new installed) firewalls? try putting them off and test if it works then. Also check with windows firewall.
